

Security Assessment Report

<https://chatgpt.com/> — <https://chatgpt.com/>
Scanned on July 13, 2026 at 10:00 UTC

Overall Security Score: 0 / 100

40 issues found out of 40 checks performed.

Executive Summary

<https://chatgpt.com/> is currently in a weak security position, with significant issues that need attention, with an overall security score of 0 out of 100. This scan identified 8 critical issues requiring immediate attention, 8 high-priority issues, 8 moderate issues, and 8 minor issues. We strongly recommend addressing the critical and high-priority items as soon as possible, as these represent the most significant risk to the site and its users.

Recommended Actions

1. **CRITICAL** Address synthetic issue #1 by applying the appropriate remediation for a critical-severity finding of this type.
2. **CRITICAL** Address synthetic issue #6 by applying the appropriate remediation for a critical-severity finding of this type.
3. **CRITICAL** Address synthetic issue #11 by applying the appropriate remediation for a critical-severity finding of this type.
4. **CRITICAL** Address synthetic issue #16 by applying the appropriate remediation for a critical-severity finding of this type.
5. **CRITICAL** Address synthetic issue #21 by applying the appropriate remediation for a critical-severity finding of this type.
6. **CRITICAL** Address synthetic issue #26 by applying the appropriate remediation for a critical-severity finding of this type.
7. **CRITICAL** Address synthetic issue #31 by applying the appropriate remediation for a critical-severity finding of this type.
8. **CRITICAL** Address synthetic issue #36 by applying the appropriate remediation for a critical-severity finding of this type.

9. **HIGH** Address synthetic issue #2 by applying the appropriate remediation for a high-severity finding of this type.
10. **HIGH** Address synthetic issue #7 by applying the appropriate remediation for a high-severity finding of this type.
11. **HIGH** Address synthetic issue #12 by applying the appropriate remediation for a high-severity finding of this type.
12. **HIGH** Address synthetic issue #17 by applying the appropriate remediation for a high-severity finding of this type.
13. **HIGH** Address synthetic issue #22 by applying the appropriate remediation for a high-severity finding of this type.
14. **HIGH** Address synthetic issue #27 by applying the appropriate remediation for a high-severity finding of this type.
15. **HIGH** Address synthetic issue #32 by applying the appropriate remediation for a high-severity finding of this type.
16. **HIGH** Address synthetic issue #37 by applying the appropriate remediation for a high-severity finding of this type.
17. **MEDIUM** Address synthetic issue #3 by applying the appropriate remediation for a medium-severity finding of this type.
18. **MEDIUM** Address synthetic issue #8 by applying the appropriate remediation for a medium-severity finding of this type.
19. **MEDIUM** Address synthetic issue #13 by applying the appropriate remediation for a medium-severity finding of this type.
20. **MEDIUM** Address synthetic issue #18 by applying the appropriate remediation for a medium-severity finding of this type.
21. **MEDIUM** Address synthetic issue #23 by applying the appropriate remediation for a medium-severity finding of this type.
22. **MEDIUM** Address synthetic issue #28 by applying the appropriate remediation for a medium-severity finding of this type.
23. **MEDIUM** Address synthetic issue #33 by applying the appropriate remediation for a medium-severity finding of this type.
24. **MEDIUM** Address synthetic issue #38 by applying the appropriate remediation for a medium-severity finding of this type.
25. **LOW** Address synthetic issue #4 by applying the appropriate remediation for a low-severity finding of this type.
26. **LOW** Address synthetic issue #9 by applying the appropriate remediation for a low-severity finding of this type.

27. **LOW** Address synthetic issue #14 by applying the appropriate remediation for a low-severity finding of this type.
28. **LOW** Address synthetic issue #19 by applying the appropriate remediation for a low-severity finding of this type.
29. **LOW** Address synthetic issue #24 by applying the appropriate remediation for a low-severity finding of this type.
30. **LOW** Address synthetic issue #29 by applying the appropriate remediation for a low-severity finding of this type.
31. **LOW** Address synthetic issue #34 by applying the appropriate remediation for a low-severity finding of this type.
32. **LOW** Address synthetic issue #39 by applying the appropriate remediation for a low-severity finding of this type.

Detailed Findings

SEVERITY	FINDING	EVIDENCE
CRITICAL	Synthetic finding #1 — critical severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 1 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	synthetic_evidence_key_0=value_7973; additional_context=some_longer_evidence_string_to_test_wrapping_b

SEVERITY	FINDING	EVIDENCE
HIGH	Synthetic finding #2 — high severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 2 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<code>synthetic_evidence_key_1=value_1638;</code> <code>additional_context=some_longer_evidence_string_to_test_wrapping_b</code>

SEVERITY	FINDING	EVIDENCE
MEDIUM	Synthetic finding #3 — medium severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 3 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<code>synthetic_evidence_key_2=value_9980;</code> <code>additional_context=some_longer_evidence_string_to_test_wrapping_b</code>

SEVERITY	FINDING	EVIDENCE
LOW	Synthetic finding #4 — low severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 4 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_3=value_5820; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
INFO	Synthetic finding #5 — info severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 5 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_4=value_1793; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
CRITICAL	Synthetic finding #6 — critical severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 6 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_5=value_9876; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
HIGH	Synthetic finding #7 — high severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 7 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	synthetic_evidence_key_6=value_6223; additional_context=some_longer_evidence_string_to_test_wrapping_b

SEVERITY	FINDING	EVIDENCE
MEDIUM	Synthetic finding #8 — medium severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 8 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_7=value_4043; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
LOW	Synthetic finding #9 — low severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 9 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<code>synthetic_evidence_key_8=value_9873;</code> <code>additional_context=some_longer_evidence_string_to_test_wrapping_b</code>

SEVERITY	FINDING	EVIDENCE
INFO	Synthetic finding #10 — info severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 10 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_9=value_2244; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
CRITICAL	Synthetic finding #11 — critical severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 11 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_10=value_3154; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
HIGH	Synthetic finding #12 — high severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 12 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	synthetic_evidence_key_11=value_6013; additional_context=some_longer_evidence_string_to_test_wrapping_b

SEVERITY	FINDING	EVIDENCE
MEDIUM	Synthetic finding #13 — medium severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 13 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_12=value_4115; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
LOW	Synthetic finding #14 — low severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 14 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<code>synthetic_evidence_key_13=value_9123;</code> <code>additional_context=some_longer_evidence_string_to_test_wrapping_b</code>

SEVERITY	FINDING	EVIDENCE
INFO	Synthetic finding #15 — info severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 15 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<code>synthetic_evidence_key_14=value_2435;</code> <code>additional_context=some_longer_evidence_string_to_test_wrapping_b</code>

SEVERITY	FINDING	EVIDENCE
CRITICAL	Synthetic finding #16 — critical severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 16 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_15=value_9008; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
HIGH	Synthetic finding #17 — high severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 17 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	synthetic_evidence_key_16=value_1172; additional_context=some_longer_evidence_string_to_test_wrapping_b

SEVERITY	FINDING	EVIDENCE
MEDIUM	Synthetic finding #18 — medium severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 18 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_17=value_2649; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
LOW	Synthetic finding #19 — low severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 19 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<code>synthetic_evidence_key_18=value_3038;</code> <code>additional_context=some_longer_evidence_string_to_test_wrapping_b</code>

SEVERITY	FINDING	EVIDENCE
INFO	Synthetic finding #20 — info severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 20 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_19=value_4944; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
CRITICAL	Synthetic finding #21 — critical severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 21 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_20=value_4806; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
HIGH	Synthetic finding #22 — high severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 22 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<code>synthetic_evidence_key_21=value_6099;</code> <code>additional_context=some_longer_evidence_string_to_test_wrapping_b</code>

SEVERITY	FINDING	EVIDENCE
MEDIUM	Synthetic finding #23 — medium severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 23 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_22=value_6951; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
LOW	Synthetic finding #24 — low severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 24 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	synthetic_evidence_key_23=value_2238; additional_context=some_longer_evidence_string_to_test_wrapping_b

SEVERITY	FINDING	EVIDENCE
INFO	Synthetic finding #25 — info severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 25 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_24=value_3179; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
CRITICAL	Synthetic finding #26 — critical severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 26 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_25=value_7956; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
HIGH	Synthetic finding #27 — high severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 27 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	synthetic_evidence_key_26=value_3058; additional_context=some_longer_evidence_string_to_test_wrapping_b

SEVERITY	FINDING	EVIDENCE
MEDIUM	Synthetic finding #28 — medium severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 28 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_27=value_9876; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
LOW	Synthetic finding #29 — low severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 29 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<code>synthetic_evidence_key_28=value_3166;</code> <code>additional_context=some_longer_evidence_string_to_test_wrapping_b</code>

SEVERITY	FINDING	EVIDENCE
INFO	Synthetic finding #30 — info severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 30 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<code>synthetic_evidence_key_29=value_4845; additional_context=some_longer_evidence_string_to_test_wrapping_b</code>

SEVERITY	FINDING	EVIDENCE
CRITICAL	Synthetic finding #31 — critical severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 31 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_30=value_3029; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
HIGH	Synthetic finding #32 — high severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 32 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<code>synthetic_evidence_key_31=value_8769;</code> <code>additional_context=some_longer_evidence_string_to_test_wrapping_b</code>

SEVERITY	FINDING	EVIDENCE
MEDIUM	Synthetic finding #33 — medium severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 33 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_32=value_1743; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
LOW	Synthetic finding #34 — low severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 34 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<code>synthetic_evidence_key_33=value_3350;</code> <code>additional_context=some_longer_evidence_string_to_test_wrapping_b</code>

SEVERITY	FINDING	EVIDENCE
INFO	Synthetic finding #35 — info severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 35 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	synthetic_evidence_key_34=value_5568; additional_context=some_longer_evidence_string_to_test_wrapping_b

SEVERITY	FINDING	EVIDENCE
CRITICAL	Synthetic finding #36 — critical severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 36 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_35=value_5720; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
HIGH	Synthetic finding #37 — high severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 37 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	synthetic_evidence_key_36=value_4753; additional_context=some_longer_evidence_string_to_test_wrapping_b

SEVERITY	FINDING	EVIDENCE
MEDIUM	Synthetic finding #38 — medium severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 38 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_37=value_8163; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>

SEVERITY	FINDING	EVIDENCE
LOW	Synthetic finding #39 — low severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 39 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<code>synthetic_evidence_key_38=value_9655;</code> <code>additional_context=some_longer_evidence_string_to_test_wrapping_b</code>

SEVERITY	FINDING	EVIDENCE
INFO	Synthetic finding #40 — info severity issue This is a synthetic test finding used to stress-test the report's page-break behavior with a large volume of content. Finding number 40 of 40, simulating a realistic-length description that wraps across multiple lines within its table cell.	<pre>synthetic_evidence_key_39=value_4251; additional_context=some_longer_evidence_string_to_test_wrapping_b</pre>
